

LAKEWOOD CHURCH OF THE NAZARENE

LOCATION: Lakewood, CO

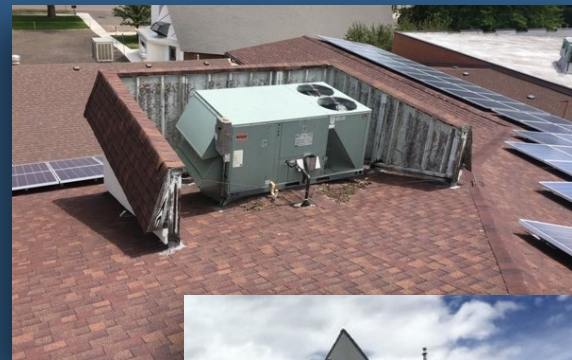

DATE OF COMPLETION: August 2018

PRODUCT REMOVED: Asphalt Shingles and Modified Bitumen

PRODUCT INSTALLED: Asphalt Shingles and T. P. O. (Thermoplastic Polyolefin)

SQUARE FOOTAGE: 44,000 Square Ft.

Gen 3 Roofing acted as the General Contractor in this project that required non-structural work. During the project, it was discovered that a large percentage of the 300 solar panels that were removed and reinstalled had not been producing electricity. Gen 3 Roofing ensured that the solar panels were properly reinstalled and produced electricity, which resulted in enormous and immediate energy cost savings for the church. Working closely with the Public Adjuster, this project involved 34,000 square feet of shingles and 10,000 square feet of flat roof which tripled in scope prior to completion.
